

Talking Points: CINC Mobile Dialer

For step-by-step instructions, see "Using the CINC Mobile Dialer" in the Help Center. Use this guide for simple, conversational ways to explain what changed, why it matters, and what clients should know.

What It Is

The mobile dialer clients already use, rebuilt from the ground up to be three times faster, with AI notetaking, transcripts, and summaries available for the first time. It adds live lead info during the call and quick outcome updates right after.

Why It Matters

- **Faster calling.** Calls connect in under 3 seconds and launch directly in the Agent App.
- **More context during the call.** Lead details, notes and recent activity are visible on the call screen, so agents do not need to switch between screens
- **Consistent caller ID.** Agents can use their saved preferred outgoing caller ID when calling leads.
- **More efficient prospecting.** Mass Dialer campaigns keep momentum going. Agents can easily queue up a list and dial straight through it, averaging about 10 more calls per hour than single outbound calls.
- **Desktop + mobile continuity.** Start a Mass Dialer campaign on desktop and continue on mobile, or start on mobile and resume on desktop.
- **Automatic documentation.** Calls made through the Agent App log the call note, time, agent, and dial attempt count. New Leads are also automatically updated to Attempted Contact.

AI Notetaking, Transcripts, and Summaries

For agents using CINC's AI Notetaker and call transcription, every call is now automatically transcribed and summarized, making it easier to review the conversation and capture key details.

Important: Transcript and summary are not automatic with a dialer subscription. It's a separate add-on package.

Two Ways to Call, and Why the Dialer Is Better

Both methods document lead activity automatically.

- **Call Using Dialer** (previously Call Using CINC Number). Requires the Mobile Dialer activated on the account, or this option won't appear.
- **Call Using Device** (previously Call Using Mobile Number). Still documents the call, but without the Dialer's extras.

Good to Know

- Tapping the number directly from a New Lead Alert text skips tracking, clients should tap Call inside the Agent App instead.
- Encourage agents to click the Source hyperlink within the New Agent Text Alert to instantly open the lead's profile within the CINC Agent App.
- Recording consent is acknowledged once per campaign, not once per lead within it.

What Clients Are Saying

"Call summary is a game changer!" Cody Zagar, Ron Sawyer Team

"The new lead info in the dialer is great, it's very clear now who I'm calling." Matt Feathers, Nashville Advantage
